THERMOCOUPLES

THERMOCOUPLES

Le programme THERMOCOUPLES EUROHEAT est spécifiquement sélectionné pour la technologie des systems de injection à canaux chauds. Les développements de les plus récents recherche assurent performances excellentes dans les environnements à haute température et offrent une grande fiabilité et performance. L'attention dans la technique et dans le contrôle de qualité de la production, appliqué à la fabrication proviennent de méthodes perfectionnées travers années de expérience et assurent le haut niveau de qualité qui distingue les produits EUROHEAT.

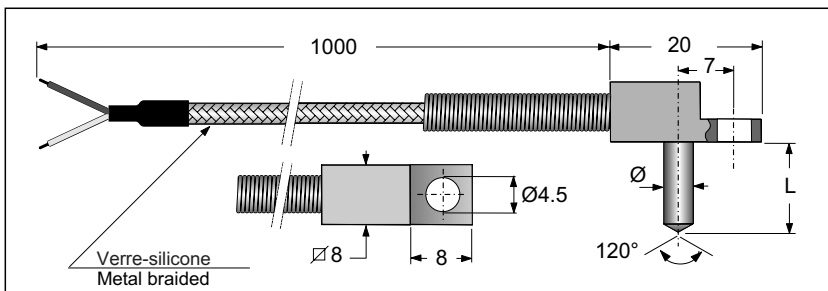

EUROHEAT THERMOCOUPLES range is specifically selected for Hot Runner Systems Technology. The latest developments of research have taken to superbe performances either on high temperature environment applicability or on both reliability and life length. The care in both production methods and quality control come from techniques matured over many years of experience and they guarantee the high quality standard level which countersign EUROHEAT products.

POUR SPÉCIAUX A LA COMMANDE INDIQUER:

- 1) Caractéristiques dimensionnelles
- 2) Jonction chaude (à la masse ou isolé)
- 3) Type de capteur (J, K, ...)
- 4) Norme de référence (DIN, ANSI, IEC, ...)

IN CASE OF SPECIAL EXECUTIONS TO ORDER SPECIFY:

- 1) Dimensional features
- 2) Hot junction (earthed, insulated)
- 3) Type of sensor (J, K, ...)
- 4) Rules (DIN, ANSI, IEC, ...)
